JOMELOP - G balsam (FOR SKINBURNS)

CONTENTS:

„Jomelop - G“ represents a dispersion extract of medical herbs in semi-solid fatty basis of bees wax and olive oil.

EFFECTS:

This balsam is assigned to a purpose of healing the skin wounds on the face and body caused by the activity of different agents, such as fire, chemicals, physical action and so on. It is used for the burns of II and III degree, t.i. for hurts when the skin is covered with blisters of destroyed completely.

DIRECTIONS:

Before applying the balsam, hands should be washed thoroughly with warm water, soap and a small brush. Wipe your hands with sterile gauze and disinfect them by using 70% solution of ethanol. Clean the skin 5 cm around the wound with a piece of gauze soaked with diluted ethanol, then wash it with 3 % solution of hydrogen-peroxide. In hard cases, when the skin is off, use both hydrogen-peroxide and sterile physiological solution. If there are blisters over the burnt skin, prick them with a sterile needle and squeeze the liquid out. Then clean with diluted ethanol once again. Using a sterile spatula, apply 1/2 mm thick layer of balsam on quadruple gauze bigger than the wound. Be careful to put the gauze over the wound so that the balsam directly covers it. To make it more comfortable, fasten the gauze with a bandage or a plaster, without tightening it up. After applying the balsam, pain slowly vanishes, and in relatively short time it totally disappears. Repeat the procedure every 24 hours with a new sterile gauze. While healing up, the wound is getting smaller, so the balsam should be applied only on the spots that are not healed up yet. After healing up, further therapy is based on using „Jomelop - E“ balsam (constant effect of balsam by using a tampon of cotton or gauze over the fresh skin) until redness disappears, t.i. skin becomes normal.

SIDE-EFFECTS:

unknown.

KEEPING:

On room temperature protected from light.

PACKING:

Aluminium tube of 35 and 90 g.

APPLICABLE:

12 months.

PRODUCTS

JOMELOP - E balsam (FOR SKINBURNS EFFECTS REMOVAL)

CONTENTS:

„Jomelop - E“ is an emulged extract of medicinal herbs in the natural olive oil.

EFFECTS:

Healing features of this balsam have a strong effect on burns of I degree. Immediately after putting it on a burnt spot, pain vanishes and redness disappears in relatively short time. It eliminates or reduces scars and cheloids caused by burns and other types of injuries.

USAGE IN CASES OF BURNS:

before applying the balsam, hands should be washed thoroughly with warm water, soap and a small brush. Wipe your hands with of sterile gauze and disinfect them by using 70% solution of ethanol. This balsam, is used for fresh burns, when there is only strong redness over the burnt spot, but no damaged skin. The burnt spot should be immediately soaked with balsam by using tampon of cotton or a piece of gauze, in order to enable a constant effect of balsam until redness is gone. Immediately after putting the balsam on, pain vanishes and approximately 2-4 hours after, redness disappears and the burnt spot is completely soothed.

USAGE IN CASES OF SCARS AND CHELOIDS:

Cheloids (deformed, wrinkled tissue) and scars should be washed with warm water and baby (or glycerine) soap. Dry the spot with a clean, soft towel, soak it with balsam and massage gently with fingertips for 5-10 minutes. Add balsam when needed. The treatment is to be continued in the morning and in the evening before going to bed. It is the same with old scars and cheloids, except the massage is harder and it lasts for 20-30 minutes. In both cases, cover scars and cheloids with quadruple gauze and fasten with a bandage or a plaster before going to bed. Duration of a therapy depends on the age and extent of a scar.

SIDE-EFFECTS:

unknown.

KEEPING:

On room temperature protected from light. Shake up strongly before use.

PACKING:

Plastic bottle of 150 ml.

APPLICABLE:

12 months.

PRONASOL (FOR SUN AND SOLARBENCHES)

- Bronzer intensive: for the normal and the tender skin. Nourishes and revitalizes the skin.
- Shields the cells of the skin from damaging by sunburn caused by too much UV rays.
- Accelerates natural pigmentation while the skin is being eased by its anti-irritation activity. The pigment gets a deep bronze colour which will remain present considerably longer.
- Can be used both before as well as after sunbathing, thus avoiding the so called peeling. The skin gets a beautiful gloss and keeps its elasticity.
- Pronasol is a purely vegetable product and holds neither preservatives nor artificial colouring or perfuming.
- Can also have a very healing effect on the sunburned skin. Softly oil the skin till the pink colour disappears. Immediately reduces the pain.
- Pronasol is hypo-allergen.
- **KEEPING:**
on room temperature protected from light.
- **APPLICABLE:**
12 months
- **PACKING:**
plastic bottles of 200 ml.
- **NOTICE:**
shake up strongly before use.

PRODUCTS

STRIET (STRIAE FORMING PREVENTION CREME AND STRIAE REMOVAL CRÈME)

DIRECTIONS:

DURING PREGNANCY:

Every evening take a warm shower, wipe your body with soft towel and massage - »Striet« into skin by rubbing it softly. Applying »Striet« woman's skin remains unchanged as if she hadn't been pregnant. Only in special cases, it is possible to continue »Striet« treatment for some time after child-birth.

AFTER PREGNANCY:

For the women who didn't use this creme treatment is the same as in »During pregnancy« but in this case »Striet« should be massaged into skin by intense pressure. The treatment is to be continued until striae do not disappear.

KEEPING:

The creme is to be kept on room temperature protected from light.

APPLICABLE:

12 months.

PACKING:

Plastic bottles of 200 ml.

NOTICE:

Shake up strongly before use.

PRODUCTS

MENTATEN (FACE AND BODY CARE CRÈME)

DIRECTIONS:

In the evening before Going to bed clean your face and neck with a piece of cotton soaked with »Mentaten«. Face should be washed with warm water and baby soap. Apply »Mentaten« once more and massage your face and neck till skin becomes dry. In the morning face should be washed with warm water without using soap and dried with soft towel. Apply »Mentaten« all over face. Leave face dry and use make up if necessary. By using this creme skin becomes smooth and with persons with wrinkles the result can be noticed too. »Mentaten« is used for body care with the same success. Once or twice a week after having bath massage it softly into your skin.

KEEPING:

On room temperature protected from light

APPLICABLE:

12 months

PACKING:

Plastic bottles of 200 ml

NOTICE:

Shake up strongly before use

ECOMER

You live as long as you can defend yourself

- 50 years of scientific R&D
- Several studies shows that ECOMER stimulates the immune system
- Rich of alkylglycerols
- A unique natural product promoting a strong immune system

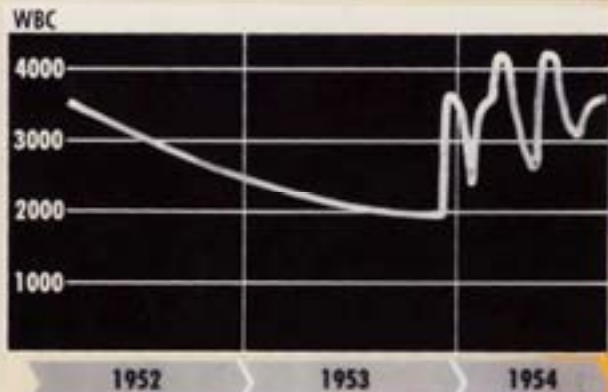

ALKYLGLYCEROLS

Occurs naturally in:

- Mothers milk
- Bone marrow
- Liver
- Spleen
- The highest concentration of alkylglycerols in nature is found in shark liver oil.

White bloodcells - leucocytes

↑ = Preparation given

Effects

- Increase the immune defence system
- Quicker healing of wounds
- Protection against infections
- Radiation protection (blood cells, bone marrow, tissues)
- Inhabitation and regression of tumour growth

PRODUCTS

- A strong immune system helps the body to fight various disorders
- Useful during the cold and flu season
- Effective against various bacterial and fungal infections
- Encourages the growth of beneficial intestinal bacteria
- A result of 40 years of scientifically research and development work conducted by Med. Dr. Astrid Brohult and Professor Sven Brohult
- Continues research
- Sold all over the world

your loyal partner in healthcare

ECOMER

- Purified shark liver oil
- Rich of alkylglycerols
- Standardised
- Natural product
- No chemical additives
